## 3. Analyzed Article Content

*"Official central bank report indicates stable inflation metrics."*

## 4. Fusion Analysis

The final verdict is a weighted linear combination of the unimodal risk scores (see Section 3), calibrated via Platt scaling fit on the project's labeled demo corpus. Any modality not submitted for this analysis defaults to a neutral 0.5 score rather than being fabricated. The modality with the largest 'Relative Impact' in the table above contributed most to the final classification.

## 5. Final Decision & Recommendations

This content does not show strong indicators of fabrication based on the signals available to this system. As with any automated assessment, cross-verification against primary sources is still recommended before using this content for high-stakes decisions.
